

Gregory Tang

Software Engineer at Wavely

Phone: 5129662477

Website: <https://www.linkedin.com/in/gregory-tang-041127153>

Email: gtang159@gmail.com

I am an active learner currently working as a full-time software engineer. I am passionate towards creating full-stack applications and flawless user experiences for individuals. I possess strong organizational and people skills, as well as technical skills which range from front-end web development with React.js and Node.js to prototyping and wire-framing with Figma.

EXPERIENCE

Wavely

August 2019 - Present

Software Engineering Intern

- Use React.js/Vue.js, HTML5, and CSS3/Flexbox, as well as collaborate with designers to create and update Wavely landing page, blog page, and about page.
- Use Express.js and Node.js to create backend with a REST api for Wavely blog page
- Configured Wavely blog page and about page to be hosted on apache servers with a distributed LAMP stack
- Created dynamic meta tags for technical SEO
- Currently creating a dashboard to consolidate iOS and Android download data using React.js and apple store/google play api.

Virta Health

November 2018 - August 2019

Office Manager

- Work cross-functionally with UXD and Engineering team members to integrate a food guide into our mobile app, which led to a 5% increase in patient success rate
- Assisted our Clinical Team with integrating search bar functionality in our internal health coach app, which reduced wasted search time by 20%

EDUCATION

UC Berkeley Extension

February 2019 - August 2019
